

Equipment Repair

Solaris Technologies has an industry-leading test, repair and equipment maintenance facility located in Irving, TX. We repair wireless, wire-line and data networking equipment providing **savings of up to 60% over traditional repair programs.**

Repair Center

Depend on Solaris' certified engineers and technicians to complete your repairs swiftly to the highest quality standards. We're also quick to handle all returned merchandise and process all RMAs within 24-hours.

Support for End-of-Life and Out-of-Warranty Products

In today's environment most companies are looking to extend the useful life of their network. Maintaining equipment that is still functioning after it comes off warranty or is considered end-of-life by the OEM can be challenging. Solaris Technologies can support these products with longer-term support when needed.

Management of Spares and Emergency Replacements

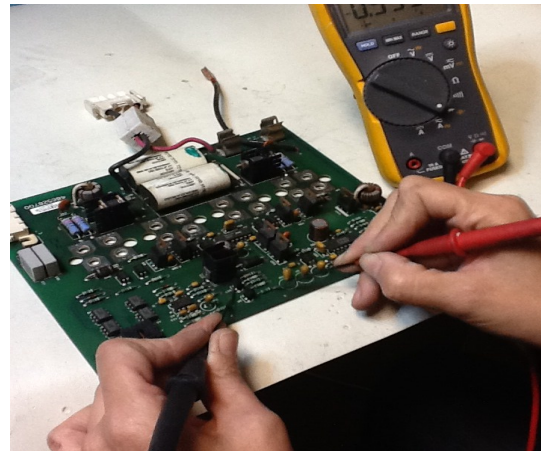

If you have a need for a centralized location to hold your spares Solaris Technologies can manage and stock your equipment spares at our location. We will manage your spares inventory and deliver it exactly when needed. For critical situations, we can also provide an immediate replacement for your equipment, shipped with the highest priority.

All Repairs Come with a One Year Warranty

We guarantee all our repair work for a full year. Our repair center staff takes great pride in the fact that our return rate on repairs is less than 1%.

Detailed Reporting

Solaris Technologies provides detailed reporting on each repair order. You will know what failed and what repairs were performed to correct the problem.
